

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A sinter powder comprising:

at least one polyamide in the form of a particle; and

at least one poly(N-methylmethacrylimide) (PMMI), in the form of a particle;

wherein the the median grain size  $d_{50}$  of the particles of PMMI is within 20% of the median grain size  $d_{50}$  of the polyamide particles,

wherein the PMMI has at least the following constituents:

i) from 14 to 85 parts by weight of:

ii) from 10 to 75 parts by weight of:

iii) from 0 to 15 parts by weight of:

iv) from 1 to 20 parts by weight of:

wherein R<sup>1</sup> to R<sup>5</sup> are identical or different aliphatic or alicyclic radicals having from 1 to 40 carbon atoms.

Claim 2 (Previously Presented): The sinter powder as claimed in claim 1, wherein the at least one polyamide comprises at least 8 carbon atoms per carboxamide group.

Claim 3 (Previously Presented): The sinter powder as claimed in claim 1, wherein the at least one polyamide comprises an unregulated polyamide.

Claim 4 (Previously Presented): The sinter powder as claimed in claim 1, wherein the at least one polyamide comprises at least one nylon which is selected from the group consisting of nylon-6,12, nylon-11, nylon-12, a copolyamide; wherein said copolyamide is based on said nylons, and mixtures thereof.

Claim 5 (Previously Presented): The sinter powder as claimed in claim 1, comprising from 0.01 to 30 wt. % of said at least one (PMMI), based on the entirety of the polymers present in the powder.

Claim 6 (Previously Presented): The sinter powder as claimed in claim 1, comprising from 0.5 to 15 wt. % of said at least one (PMMI), based on the entirety of the polymers present in the powder.

Claim 7 (Previously Presented): The sinter powder as claimed in claim 1, comprising a mixture of particles of said at least one (PMMI), with particles of polyamide.

Claim 8 (Previously Presented): The sinter powder as claimed in claim 1, comprising polyamide particles into which said at least one (PMMI) has been incorporated.

Claim 9 (Previously Presented): The sinter powder as claimed in claim 1, which further comprises at least one member selected from the group consisting of an auxiliary, a filler, a pigment and mixtures thereof.

Claim 10 (Previously Presented): The sinter powder as claimed in claim 9, wherein the auxiliary is present, and comprises a flow auxiliary.

Claim 11 (Previously Presented): The sinter powder as claimed in claim 9, wherein the filler is present, and comprises glass particles.

Claim 12 (Previously Presented): The sinter powder as claimed in claim 9, wherein the filler is present, and comprises aluminum particles.

Claim 13 (Previously Presented): A process for preparing the sinter powder as claimed in claim 1, comprising:

mixing at least one polyamide with said at least one (PMMI).

Claim 14 (Previously Presented): The process as claimed in claim 13, comprising

mixing a polyamide powder obtained by reprecipitation or milling, in suspension or in solution in an organic solvent, or in bulk, with said at least one (PMMI).

Claim 15 (Previously Presented): The process as claimed in claim 13, comprising compounding said at least one (PMMI) into a melt of polyamide, to obtain a mixture; and  
milling said mixture to give a laser sinter powder.

Claim 16 (Original): A process for producing moldings, which comprises:  
selectively laser sintering the sinter powder as claimed in claim 1.

Claim 17 (Previously Presented): A molding produced by laser sintering, which comprises:  
at least one (PMMI), and at least one polyamide.

Claim 18 (Previously Presented): The molding as claimed in claim 17, wherein the at least one polyamide has at least 8 carbon atoms per carboxamide group.

Claim 19 (Previously Presented): The molding as claimed in claim 17, wherein the at least one polyamide comprises at least one member selected from the group consisting of nylon-6,12, nylon-11, nylon-12 and mixtures thereof.

Claim 20 (Previously Presented): The molding as claimed in claim 18, wherein the at least one polyamide comprises at least one member selected from the group consisting of nylon-6,12, nylon-11, nylon-12 and mixtures thereof.

Claim 21 (Previously Presented): The molding as claimed in claim 17, comprising from 0.01 to 30 wt. % of said at least one (PMMI), based on the entirety of the polymers present in the powder.

Claim 22 (Previously Presented): The molding as claimed in claim 17, comprising from 0.5 to 15 wt. % of said at least one (PMMI), based on the entirety of the polymers present in the powder.

Claim 23 (Previously Presented): The molding as claimed in claim 17, which further comprises at least one member selected from the group consisting of a filler, a pigment and mixtures thereof.

Claim 24 (Previously Presented): The molding as claimed in claim 23, comprising glass particles.

Claim 25 (Previously Presented): The molding as claimed in claim 23, comprising aluminum particles.

Claim 26 (Canceled).

Claim 27 (Previously Presented): The sinter powder as claimed in claim 1, wherein the constituents of the at least one PMMI are present in the following amounts:

i) from 30 to 70 parts by weight of:

ii) from 20 to 40 parts by weight of:

iii) from 0 to 15 parts by weight of:

iv) from 2 to 12 parts by weight of:

wherein R<sup>1</sup> to R<sup>5</sup> are -CH<sub>3</sub>.

DISCUSSION OF THE AMENDMENT

Claim 1 has been amended by inserting that the median grain size  $d_{50}$  of the particles of PMMI is within 20% of the median grain size  $d_{50}$  of the polyamide particles, as supported in the specification at page 5, lines 23-26.

No new matter is believed to have been added by the above amendment. Claims 1-25 and 27 remain pending in the application.
